ABSTRACT: Counterfeiters have been messing with postal meters, ripping
 off the US Postal Service to the tune of \$100 million a year. But PKI (
 public key infrastructure) technology could help staunch the flow of
 illicit dollars - and let customers buy postage online.

USPS To Use PKI To Offer Electronic Postage

(US Postal Service moves closer to selling postage online after
 establishing public- key infrastructure; service will use PKI as part
 of Information-Based Indicia Program)

Newsbytes News Network, p N/A

September 10, 1998

DOCUMENT TYPE: Journal ISSN: 0983-1592 (United States)

LANGUAGE: English RECORD TYPE: Fulltext

WORD COUNT: 528

ABSTRACT:

The US Postal Service is moving toward selling postage online, having
 set up a public-key infrastructure in 8/98. PKI will be used as part of
 the Information-Based Indicia Program (IBIP), which sells postage via
 the Internet, letting users print bar codes on envelopes or labels from
 printers at their home offices or in small businesses. Each of the digital
 stamps consists of a bar code that has unique, scannable data. The US
 Postal Service is losing about \$100 mil per year due to meter tampering,
 according to postal officials. Meters represent some \$21 bil per year in
 revenues. Cylink Corp (Sunnyvale, CA) provided the PKI system, which will
 create authorization certificates, audit transactions and recover
 interrupted transactions and revoke certificates. The full text further
 discusses the topic.
